

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light greenish-blue. They are positioned diagonally, with the blue one partially covering the green one.

Airline Reservation System

Austin Albrechtsen

What does this product do?

- Allows airlines to add flights with details about the flight and availability
- Allows airlines to search and modify flights
- Allows customers to choose flights and book them
- Allows customers to choose which class they would like to fly in for a flight
- Allows customers to search for flights based on criteria
- System allows users to create account as well as provides admin and guest accounts
- System generates ticket booking reports

Who utilizes this system

- Airports will utilize this system in order to update and keep track of the flights they have
- Customers will use this system to reserve flight bookings and create customer information as well as user accounts
- Admins may view ticket bookings in a report

Roadmap of Demo

- Present how system is connected to database
- Present how github has all the documentation of the code, testing, and data collection
- Present how the apache database executes the code written
- Present the use cases of this system
- Present test data in system
